## PROJECTS

### A TO Z DISPATCH

- Developed a real-time Ride Scheduling System where users can book rides via the web platform or mobile app.
- Secure Stripe Payment Integration Where users can pay securely through Stripe payment gateways, ensuring safe and seamless transactions
- Multiple Language Translation & Localization making it adaptable for global business
- CMS (Content Management System) – Clients can add, edit, and delete content, including images and ride details, directly via the admin panel
- Comprehensive Admin System – Having full access to manage bookings, assign drivers, track ride statuses, and generate reports

### TUTEELINE

- Implemented a student portfolio management system that allows users to showcase academic achievements, skills, and experiences
- Developed a centralized application system to streamline college, university, and job applications.
- Integrated a real-time exam result publication platform for students, enabling quick and secure access to SEE

and other exam results

- Implemented a dynamic messaging system, allowing students to connect with peers and build networks
- College & University Applications features which Simplifies the application process by centralizing documents, applications, and requirements

#### **TECHNICAL SEWA**

- Developed a e-commerce site with Next.js To Ensures a fast, scalable, and server-rendered web experience for seamless navigation and performance
- Implemented SEO Optimization To Enhances search engine rankings with structured content and keyword-rich pages for better visibility
- Blog Section which Provides regular updates on appliance maintenance, technical guides, and service offerings
- Developed a Door-to-Door Service System Which Allows customers to schedule home appliance repairs for added convenience
- Enabled E-Commerce for Spare Parts – Offers an online catalog where users can purchase refurbished and new appliance parts
